TEUTONIC PURSUERS
SUFFER HEAVILY

Russia Is Endeavoring to
Remedy Shortness
of Munitions

Berlin, via London, June 30, 3:55 p. m.—The Russians have begun a retreat from the Vistula river and the district of Zamosz, southeast of Lublin, in Russian Poland, according to an official statement issued to-day by the army headquarters.

The Germans and Austrians are pressing the Russians hard in their retreat through northwestern Galicia and southern Russian Poland toward the river Bug. The energy of the pursuit, however, is costing the Teutonic forces dear, according to Petrograd statements, which mention enormous losses inflicted on the enemy during the withdrawal from the Dnieper region north of Halicz.

Meanwhile Russia is endeavoring to better the organization of her munition supply system. Having been given unlimited money and virtually unrestricted power, the new board of military supplies is expected to remedy the shortness in munitions, to which the Russian reverses in Galicia are largely attributed.

Reports from the Tyrol and Trentino districts mention notable activity of Austrian artillery confronting the Italian invasion. Italy's forces are making slow headway on the Isonzo, unfavorable atmospheric conditions being mentioned as interfering with the operations there.

A recent conference of the German chancellor and the German and Austrian foreign ministers is followed by assertions in German quarters that hopes of the quadruple entente powers for military help from Roumania and Bulgaria has been materially lessened. In connection with this situation, the occupation of Scutari by the Montenegrins is an interesting development.

Positions at Krithia Will Soon be Taken,
Is Asserted in Dispatch from Athens
—French Found 6,000
Dead Turks.

Paris, June 30, 1:20 p. m.—A Havas agency dispatch from Athens says: "The exhaustion of the Turks facing the French forces on the Gallipoli peninsula is evident and leads to the belief that the Turkish positions at Krithia will soon be taken by assault. In a recent advance by the French 6,000 Turks were found dead in the trenches.

"Recent fighting in the Dardanelles resulted in an appreciable advance by the allies," the dispatch declares. "French troops, under the inspiring leadership of General Gouraud, are particularly distinguished themselves. Facing the French, the Turkish front does not exceed three and a quarter miles, which the artillery sweeps continually.

"The Turks are meeting with growing difficulties in bringing up reinforcements and supplies, while the allies have every facility for supplying their needs."

Paris, June 30.—Describing the occupation of Scutari, Albania, by Montenegrin troops, the Rome correspondent of the Havas agency says:

"Montenegrins, Catholics, members of the Orthodox faith, the communal authorities, members of the government, the police force, the schools and the population, proceeded by flags and bands, marched out of the city. At noon came the triumphant entry of the Montenegrins, preceded by an advance guard. Following the advance guard were priests in their ceremonial robes, carrying the cross five minutes later in a hospital.

and religious standards; then came the main Montenegrin army led by General Vechovich and the Montenegrin consul, and bands of irregular Albanians followed.

"The Austrian consul lowered the flag and placed the consulate in the care of the Greek consul.

"The general staff of the troops occupying Scutari have taken charge of the administration of the city, declaring that citizens must henceforth consider themselves subjects of Montenegro.

"General Vechovich addressed the foreign consulates, announcing that he was taking possession of the city in the name of King Nicholas. Patrols guard the consulates and public buildings."

ALIENISTS CALLED
AGAINST THAW

Their Testimony Is Expected to Combat the Evidence Put in by Thaw's Witnesses Who Declared Him Sane Now and Always.

New York, June 30.—The attorneys for the state were ready to begin their assault to-day upon the bulwark of evidence constructed by Harry K. Thaw to prove himself sane and entitled to freedom. When the hearing before Supreme Court Justice Hendrick and jury was continued, the state took up the cross-examination of the last of the Thaw witnesses. It was expected that these witnesses would be disposed of in time to permit the prosecution to open its case to-day with the introduction of documentary evidence.

The attorneys for the state had their own alienists on hand to-day to combat the testimony of the Thaw medical experts and they promised some startling new evidence regarding the prisoner's mental condition.

HUNDREDS OF GUESTS

Overrun Bowling Green, Mo., for the Clark Wedding.

Bowling Green, Mo., June 30.—Hundreds of guests from other states, many of them prominent in the political and social life of the nation, are in Bowling Green to-day to attend the wedding of Genevieve Clark, daughter of Champ Clark, speaker of the national House of Representatives. Miss Clark is to be married to-day to James M. Thomson, publisher of the New Orleans Item.

To the people of the state Speaker Clark issued a blanket invitation, and so great was the throng of Missourians who took him at his word that the town could scarcely hold them. The wedding is to take place at "Honey Shuck," the Clark home. For weeks wedding presents have poured into the home. President Wilson sent two silver caskets, the Missouri congressional delegation sent a silver flower basket three feet high and Congress gave a diamond necklace.

Scores of members of Congress and Missouri state officials are here and Senator Reed and Stone came on a special train. Governor Major of Missouri is among the guests.

FIRE IN SUBMARINE.

Caused Considerable Alarm, as 300 Gallons of Gasoline Were Aboard.

Newport, R. I., June 30.—Fire in the submarine D-4 caused some excitement at the torpedo station yesterday. Discovery of smoke belching from the forward compartment was followed by the sounding of an alarm which brought every available man in the station, together with the crews of four vessels tied up nearby, to the scene as fire fighters.

The fact that the submarine had 300 gallons of gasoline aboard made the officers wary of letting men risk their lives, but the blaze was eventually quenched by the use of sand. It was found to have started from spontaneous combustion as a result of a leaking gasoline tank.

SANITARY CORPS CREATED.

By Philippine Government with U. S. Public Health Service as Model.

A new Philippine health law, creating a service similar in organization to that of the United States public health service, becomes effective July 1. This legislation for a health body, which will have supervision over all matters of sanitation in the Philippine Islands. Probably no greater compliment has ever been paid the U. S. public health service than that of modeling after it the Philippine organization.

The service as contemplated is to consist of a director and assistant, clerks of divisions, medical inspectors, and senior and junior surgeons. These officers are to be commissioned by the Philippine government, are to hold office during good behavior, and cannot be dismissed without cause. In other words they will be independent in action and entirely free from political influences. All appointments and promotions are subject to physical and professional examinations, and salaries are regulated by length of service.

The administration of the health laws of the respective provinces and all medical, surgical and sanitary work of a public nature, will be supervised by this body. The director of health is to be appointed by the governor general, the present incumbent, Surgeon John D. Long of the United States public health service, being retained. An advisory council of hygiene is provided, to consist of seven representative members, appointed largely from educational institutions. The salaries of the members are to be merely nominal. Sanitary engineers and technical experts will be employed. For the purpose of administration the provinces are divided into sanitary divisions which may be composed of several municipalities.

Funds for health purposes are to be raised in a most novel manner. Provincial boards and municipalities are required to set aside not less than five per cent nor more than ten percent from their general funds, these amounts to be devoted to sanitation and carrying out the purposes of the act. Balances which accumulate from year to year are to be used for establishing hospitals and benevolent institutions. This forever prevents a signally policy in making health appropriations and places the men before the dollar for all time.

WAS ACTIVE IN BUSINESS.

William H. Anderson of Waterbury Conducted Four Farms.

Waterbury, June 30.—Another prominent resident of this place passed away yesterday forenoon, when William Henry Anderson, until a few years ago in active business at the Center, died, after a year's illness with Bright's disease, having been confined to the bed a week.

The deceased was born in the province of Quebec, although the home of his parents was in Chertsey, N. Y., and there he lived until 15 years of age, his parents' names being Alexander and Sophia Anderson. At that age he came to Waterbury and remained in the family of William Moody and attended school. For 15 years he was an engineer on the Central Vermont railroad. Later he took up farming and the lumber business, conducting a large lumber business at the Center, until he sold out nine years ago to P. D. Pike & Son. Since that time he has spent his time overseeing his four farms, until prior health compelled him to give up all active work. Mr. Anderson's life was a very busy one, too busy for public work, no town offices being considered by him. He was a good citizen and one helpful in the community and town.

Mr. Anderson was married June 11, 1881, to Adda Clough of Stowe, most of their married life having been spent at Waterbury Center. He is survived by his widow and three children, Mazzini C. Anderson, Miss Sophia Belle Anderson and William Floyd Anderson, all being at home at the time of their father's death. There is also one grandchild and two brothers—Levi Anderson of St. Albans and Thomas Anderson of Chertsey, N. Y. The deceased was a member of Winooki lodge, No. 40, F. and A. Such a large attendance from the town where he formerly lived showed the high esteem in which the deceased was held there, as well as in this town. Members of the G. A. R. also attended, and the casket was draped with the flag.

He was struck by the mudguard of the car and made unconscious. Last night he had not yet regained his senses. It has not yet been determined whether or not his skull is fractured.

ACCEPT BID
FOR CLEAN-UP

City Council Will Commission S. D. Sibley for Vermont State Library

GARBAGE REMOVAL
PLAN DEFEATED

City Notifies Proposed Lessee of Opera House to Hasten Matters

One of Alderman J. F. Cook's cherished schemes for the introduction of a refuse removing system in Barre was partially realized at a special meeting of the city council that followed the regular aldermanic session last night, when a maze of schemes for redeeming the city from unsightly waste accumulations was unscrambled long enough to pluck therefrom an offer of S. D. Sibley wherein he guarantees to remove by weekly collections all tin cans, papers, etc., exclusive of garbage and swill, at the rate of \$650 per year. Details of the plan are to be worked out more carefully in a tentative contract which the aldermanic health committee is to draft and submit to the council for its approval.

Borne in on the favoring breeze of the health committee report in its behalf, Mr. Sibley's offer to make regular garbage removals for \$750 per year was made the subject of a long and rather protracted discussion. Alderman Cook referred to what Brookline, Mass., and other places have been doing in the same line and unfolded a copy of the contract which the city of Burlington uses in exacting service from its garbage remover. The favorable report was signed by Alderman Cook and Glysson, with Alderman Bruce, the third member of the committee, who has consistently maintained that there is law enough in the city ordinances to enforce each household to remove garbage, as the dissenting member. Alderman Rossi moved that the report of the health committee be accepted and that a contract at \$750 per year be drawn up and reported to the council.

On the request of Alderman Bruce and Glysson, a yeay and nay vote was taken, with the result that the motion was lost, Alderman Glysson, Shurtleff, Keast and Bruce voting in the negative, while Alderman Cook, Rossi and the mayor voted yes. It was on Alderman Rossi's motion that the second offer of \$650 was accepted.

Given Until July 13 to Sign Opera House Contract.

What the city fathers discern as symptoms of malingering on the part of George J. Goodkowski, whose bid on the opera house lease was accepted by the council some several weeks ago, are to be nipped in the bud, as the result of a written reply to City Attorney Wishart's telegram that the city desired the contract submitted to Mr. Goodkowski to be signed and returned to once. In his reply the York Beach hotel man and theatrical manager asked that the matter be held in abeyance until Sept. 1, or until such time as he has occasion to confer with his partner in the enterprise in regard to managing the theatre. On the motion of Alderman Shurtleff, the clerk was instructed to address Mr. Goodkowski with the suggestion that he sign the lease before July 13, or submit an additional bond of \$500 by that date as evidence of his good faith.

Another party that is going to be made to come to time, according to the councilors, is the Barre & Chelsea railroad, which stands accused of careless or culpable negligence in the matter of applying for building permits before contemplated projects are under way. The alleged remissness of the railroad came to the surface along with a number of building applications submitted by the inspector. City Attorney Wishart reported the railroad's representative as saying that the company had not been disposed to ignore any of the municipal regulations relating to building and that the violation was purely an oversight. Inspector Rand gave statistics, etc., to show that it was not the first offense for the Barre & Chelsea and on the motion of Alderman Cook, it was voted to instruct the city attorney to prosecute the railroad. It is claimed that improvements in the company's enginehouse
